

Rapid Remote Deposit

Bank deposits on your schedule, 24 hours a day!

Rapid Remote Deposit offers First National business customers the ultimate in convenience. With an Internet connection and an easy-to-use check-scanning machine, you'll be able to deposit checks electronically when it's most convenient for you. And, you'll have access to your funds faster than ever before.

What are the benefits of Rapid Remote Deposit?

Remote deposit creates an efficient check-depositing process by:

- Eliminating time-consuming trips to the bank;
- Allowing you immediate access to electronic scans of each check;
- Offering seamless integration with accounting software and online banking; and
- Posting same-day credit to your account for scans sent by 4 p.m.

This affordable, easy-to-use solution is perfect for business customers who:

- Want a more efficient use of their employees' time;
- Want to expedite funds' availability; and
- Process numerous checks per month.

It's simple – here's how it works:

1. Connect your check scanner to a computer with Internet access.
2. Electronically deposit your funds by placing a check in the feed tray.
3. The machine scans your check and sends an electronic record to First National.
4. You're done – funds will be posted to your account on the same day.*

**Note: this only applies for scans sent by 4 p.m.*

An investment that provides years of value

First National's Rapid Remote Deposit provides 24-hour convenience, while saving you time and providing you with security and peace of mind today, tomorrow and long into the future.

There are multiple financing options available to meet your needs – whether you are looking to lease or purchase a scanner, First National is committed to finding a solution that fits your budget.
